

Storyboard Plan: Enhancing Predictive Models for World University Rankings

1. Introduction Story Point

- **Message:** Introduce the project and its significance in the context of world university rankings.
 - **Visuals:**
 - Infographic or timeline illustrating the evolution of university rankings.
 - Global map highlighting universities across different continents.
-

2. Exploratory Analysis and Early Research Questions

- **Message:** Discuss the initial exploratory analysis conducted to understand data characteristics and trends.
 - **Visuals:**
 - Bar charts showing distributions of key metrics (publications, quality of education, influence).
 - Scatterplots depicting relationships between variables.
-

3. Pivot: Hypothesis or Key Question

- **Message:** State the hypothesis or question that guided the subsequent analyses.
 - **Visuals:**
 - Diagram illustrating the hypothesis or research question.
 - Bullet points summarizing the objectives of the analysis.
-

4. Results of Analyses

- **Message:** Present findings from various analyses conducted (e.g., linear regression, feature importance).
 - **Visuals:**
 - Tables showing MSE and R-squared scores for different models.
 - Line graphs or heatmaps illustrating correlations and model performance.
-

5. Interpretations of Analysis Results

- **Message:** Interpret the implications of the analysis results on model performance and data bias.
- **Visuals:**
 - Annotations on charts explaining key findings.
 - Comparison visuals showing predicted vs. actual values.

6. Summary of Results' Utility

- **Message:** Summarize how the results address initial research questions and hypothesis.
- **Visuals:**
 - Key takeaway bullet points.
 - Visual representation of improved model predictions.

7. Next Steps for Further Analysis

- **Message:** Propose future directions and enhancements for the predictive models.
- **Visuals:**
 - Flowchart outlining steps for model refinement.
 - Timeline for implementation of next steps.

8. Limitations of the Study

- **Message:** Discuss limitations encountered during the study that impact the interpretations and generalizability of results.
- **Visuals:**
 - List of limitations with icons or symbols.
 - Venn diagram illustrating overlapping constraints.

Conclusion

This storyboard plan outlines a structured approach to communicate the journey of enhancing predictive models for world university rankings. Each story point will guide the audience through the project's progression, from initial exploratory analysis to interpreting results and proposing future steps. Visuals will play a crucial role in illustrating data trends, analysis outcomes, and recommendations for further improvement. This approach ensures clarity and engagement while showcasing the project's impact and potential for future research.
